*Annual Report  
1965*

## PRESIDENT'S MESSAGE

It gives me particular pleasure to introduce you to this year's Annual Report on the Company's affairs.

The year has been one of organization and growth and certainly the most significant in the history of the Company.

As indicated in the financial statements, the Company is in sound financial position—revenue is up over 275 percent compared with the previous year and a further substantial increase is currently being realized.

The Company also has more than adequate working capital for further expansion, plans for which are well under way.

In recommending to you this report, I would like to express grateful appreciation to our shareholders for continued ownership in the Company and extend my welcome to our many new shareholders, also my personal thanks go to the management and staff for their valued contribution during a year of rapid expansion which entailed numerous organizational changes.

To look ahead, the oil and gas industry is big business in every segment—production—sales and profits are chalking up new records. In view of this trend, there is no reason why our prosperity and growth should not continue.

In 1967, we as Canadian citizens will be celebrating our Centennial year and as a member of the Canadian community, we are the key to 1967, not only for what we do in the Centennial year, but for the future of our country in its second century. The official Centennial symbol is "Out of the past—the future". Let us think of Canada and strengthen our Canadian industries. Support your Company, Supreme Oil and Gas Ltd.—Canadian owned and operated . . . "Canadian all the way".

Edmonton, Alberta  
December 6th, 1965

Harold P. W. Wright,  
President, Chairman of the Board.

# DIRECTOR'S REPORT

## To the Shareholders of Supreme Oil and Gas Ltd.

# 1965 IN REVIEW

The Board of Directors take pleasure in submitting this Annual Report covering the operations of the Company for the year ending December 1, 1965, and we believe you will be very gratified with the progress your company is making.

We also submit for your review the auditors report and financial statements for the fiscal year ending July 31, 1965, with comparative figures at July 31, 1964. In addition, comparative figures showing the affairs of the Company as at November 30, 1965.

### Revenue

The Company enjoyed a profitable year with gross revenue up over 275 percent (\$154,937.08 compared with \$41,332.54 for 1964). Operating revenue mounted towards the end of the year which is not reflected in the financial statements.

Current monthly income is on the basis of \$240,000.00 per year.

During the year, the Company engaged in various advertising promotions, particularly in connection with the marketing division, which greatly contributed to the record increase in revenue.

### Increased Assets

The assets of the Company substantially increased mainly due to the acquisition of additional service station properties and equipment. As these assets were not owned by the Company for the full twelve months prior to July 31, 1965, no depreciation was allowed for during that period.

### Increased Working Capital

Working capital has been greatly improved by the sale from the treasury of 200,000 shares which netted the Company \$160,000.00. Additional financing arrangements of a rather substantial nature are presently being negotiated to further increase the working capital position during the coming year.

GROSS REVENUE GRAPH 1962-65

We are pleased to advise that as of the date of this report, the Company is substantially liability free with the exception of accounts incurred in the normal course of business and long term mortgage financing on service station properties.

It is the Company's policy to finance service station properties on long term mortgages secured against service station sites being acquired and therefore liabilities of this nature are more than offset by the assets representing the cost of the service station properties owned by the Company.

In connection with the exploration division of the Company, it is the Board's policy to use capital to acquire revenue bearing equities and use revenue rather than capital to drill oil and gas wells, thus minimizing the use of capital on speculative ventures. It is for this reason that during the past year particular emphasis has been given to increasing revenue which has mainly been accomplished through the marketing division of the Company.

At the present time, the Company owns varying interests in 4,300 acres of petroleum and natural gas rights in Alberta and Saskatchewan and has varied interests in fifteen oil wells, in addition the Company has interests in thirteen un-drilled locations all of a proven nature.

**Liability  
Free**

**Company's  
Policies**

**Exploration**

ASSETS vs LIABILITIES 1962-65

Plans call for an extensive acquisition and development program with the initial exploration project involving the participation in the drilling of five wells on the SE 1/4 of 3 and SW 1/4 of 6, 50-1 W4.

Considerable research has been undertaken into the subject of thermal recovery in this area and in the Company's opinion a thermal recovery program should be undertaken on the Company's acreage. It is estimated that the oil in place underlying the SE 1/4 of 3 is in the neighborhood of 2,734,000 bbls. and under the SE 1/4 of 6 approximately 2,600,000 bbls. The recovery factor being used for primary reserves at the present time is approximately 10 percent of the oil in place. If thermal processes are used, the recovery factor should be approximately 50 percent of the oil in place. Therefore the oil recoverable from SE 1/4 of Section 3 would be approxi-

## Exploration

(cont'd)

mately 1,367,000 bbls., and from SW 1/4 of 6 approximately 1,300,000 bbls., providing proper thermal recovery methods are used. The total recoverable oil from the two properties under discussion therefore would be approximately 2,667,000 bbls., before royalties.

Other lease blocks in the same area are presently being evaluated with the view of the Company participating in a proposed 16 well development program during the coming year.

In the Berland River area, Alberta, where the Company owns 50 percent working interest in 1,280 acres, extensive geophysical exploration has been undertaken by several major oil companies including Shell Oil Company, Pan American Petroleum Corporation, British American Oil Company and Imperial Oil Enterprises.

The most significant gas discovery made to date in Canada is that of the British American-Shell Berland River No. A-8-4, located in Lsd. 8-4-59-23, W 5 M., approximately 13 1/2 miles from the Company's land. During the drilling, cores opened up a porous D-3 gas-bearing reef, 551 feet in thickness. This is the thickest pay section in Canada to date. It is reported to have an open flow potential of 1.5 billion cubic feet daily. With this tremendous potential a market will undoubtedly be found in the near future. Wells drilled to date have pay sections varying from 35 feet to 217 feet. A well originally completed in 1956 as a Mississippian gas discovery, Imp. et al Obed # 5-13-54-23, W5M, is located 20 miles southeast of the Company's acreage. The well was deepened in 1964 where it is reported to have found a thick gas section in the D-3 reef. Technical difficulties prevented full evaluation of this gas section. A follow-up well 1 1/2 miles northwest of the discovery is rumored to have found gas in the Winterburn section and the D-3, the amounts and size of pay have not been released as yet. Despite the fact that very few wells have been drilled in the area, very encouraging results have been obtained thus far.

The price of \$1,655,444.44 paid by Imperial Oil for 11,360 reservation acres, and \$3,153,246.00 recently paid by Pan American Petroleum Corporation for 12,800 acres of reservation rights indicates the value these companies place on land in this area.

Another area of particular interest is the Edson region of central Alberta. Oil is being produced from the Cardium sand and gas has been discovered in the Mississippian zone. The closest well to the Company's holdings was drilled by Uno-Tex, located 4 1/2 miles to the west of the Company's property. Recently, Uno-Tex paid \$606,240.00 for adjacent acreage to the east of the Company's property and the Calgary and Edmonton Corporation paid \$868,383.00 for adjacent acreage to the west.

There is considerable drilling activity in the immediate area and several locations have been announced in close proximity to the Company's property.

In general, whilst the Company's petroleum and natural gas holdings may be comparatively few as compared with other companies, it is without a doubt that the properties owned by the Company are in strategic locations and are of considerable value.

## Marketing

Under the marketing division of the Company there are at present 7 service stations open under the "Supreme" sign and with the enthusiastic response of the motoring public to "Supreme Service Stations" at least 6 additional locations are scheduled to open during the next few months, also at least 28 other locations are planned throughout Alberta and British Columbia.

The Company realizes the competition in the marketing of petroleum products and is therefore concentrating on special situations, namely locations in connection with shopping centers, hotels, motels, drive-in restaurants, car washes, etc., where competition is at a minimum.

It is the Company's policy to offer to the motoring public clean modern facilities and the finest gasoline and lubricants on the market. "Supreme" service stations welcome all credit cards and carry all popular brands of lubricating oils.

The names and locations of "Supreme" service stations presently open are as follows:

**SUPREME TERRACE HEIGHTS SERVICE—7446 - 101 Avenue, Edmonton, Alberta.**

This service station, is located across from a modern shopping center on one of the main City arteries. The property consists of four lots, a large three bay service station, also a separate auto body shop.

**SUPREME SOUTH BEND SERVICE—5138 - 103 Street, Edmonton, Alberta.**

This station is located across from the new seven storey Riviera Hotel, on the southern outskirts of the City, on Highway No. 2, the main artery entering Edmonton from Calgary, and consists of a large four bay service station.

**SUPREME WINTERBURN SERVICE, Highway 16 West, Edmonton, Alberta.**

This service station is located on Highway 16 West on the main artery from Edmonton to Jasper National Park and is adjacent to a motor hotel. The Company has considerable land along with the service station and consideration is being given to expanding the premises.

**SUPREME JASPER PLACE SERVICE, 9448 - 149 Street, Edmonton, Alberta.**

This service station is located on another main City artery serving west Edmonton, and consists of a large four bay service station.

**SUPREME OIL CITY SERVICE, 7120 - 118 Avenue, Edmonton, Alberta.**

This station, is located on the main City artery serving the residential and industrial areas of north Edmonton, in close proximity to the Edmonton Exhibition Grounds. The property consists of four lots and a large modern three bay service station.

**SUPREME EASTWOOD SERVICE STATION, 12015 Fort Road, Edmonton, Alberta.**

This station is located on a main artery serving the northern industrial area of Edmonton.

**SUPREME ALASKAN MOTORS, 11903 Kingsway Avenue, Edmonton, Alberta.**

This station is located on the main City Center artery across from the new \$2,500,000.00 modern Edmonton Inn Hotel. The property consists of a large three bay service station, a two bay auto body shop, a restaurant and second storey offices.

**SUPREME BOW RIDGE SERVICE, Bowness, Calgary (Trans-Canada Highway), Alberta.**

The Company has acquired a fifty year lease on the above mentioned location situated on Trans-Canada Highway between Calgary and Banff. The Company has an option to acquire the land at fair market value at any time during the fifty year period. It is intended that the Company build a "Town and Country" style "Supreme" service station on this property by spring, 1966. Development has been held in abeyance owing to title difficulties by the land owners. It is interesting to note that the traffic count past this location is in excess of one million vehicles a year.

In addition to the locations above referred to, the Company has entered into 6 separate agreements with developers of shopping center complexes in the Edmonton and Calgary areas whereby "Supreme" style service stations will be constructed at no cost to the Company, except for the supply on loan of equipment. These stations will be leased by the Company for periods ranging from fifteen years to twenty years.

There are also 28 other locations under consideration throughout Alberta and British Columbia.

Negotiations are also under way with two other marketing firms on the possibility of merging their marketing facilities under the "Supreme" sign.

In looking to the future, the Company has enjoyed an exceptionally good year in all aspects of its operations and in our view there is no reason why this trend should not continue.

December 6, 1965

### AUDITORS' REPORT

We have examined the balance sheet of Supreme Oil and Gas Ltd. as at July 31st, 1965 and the statements of profit and loss and deficit for the year ended on that date and have obtained all the information and explanations we have required. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion the attached balance sheet and statements of profit and loss and deficit, supplemented by the notes appended thereto, present fairly the financial position of the company as at July 31st, 1965 and the results of its operations for the year ended on that date, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year, with the exception that no depreciation has been provided in the accounts for the 1964 and 1965 fiscal years.

## NOTES TO THE BALANCE SHEET AS AMENDED

July 31st, 1965

### 1. Petroleum and Natural Gas Leases and Interests:

The undeveloped petroleum and natural gas leases and interests are valued at cost or appraised values where applicable, as approved by the directors on March 31st, 1964. Additions since that date are at cost.

	1965	1964
Proven developed, at cost - - - - -	25,422.39	20,265.00
Undeveloped - - - - -	204,526.19	204,526.19
	<u>\$229,948.58</u>	<u>\$224,791.19</u>

### 2. Fixed Assets:

The fixed assets are as follows:

	1965	1964
Land - - - - -	34,069.05	18,051.05
Building and Improvements - - - - -	85,809.62	50,020.97
Service Station Equipment and Signs - - - - -	29,114.97	12,039.18
Office Equipment - - - - -	7,839.57	7,027.47
Mobile Equipment - - - - -	1,040.00	1,040.00
Production Equipment - - - - -	11,084.94	6,897.28
	<u>\$168,958.15</u>	<u>\$95,075.95</u>

### 3. Long Term Liabilities:

Details of the long term debts at July 31st, 1965 are:

	Balance July 31st, 1965	Payments Due in the Next Twelve Months
Bank Loan (Secured) - - - - -	23,500.00	6,000.00
Mortgage at 6% - - - - -	41,126.18	3,600.00
Mortgage at 7% - - - - -	11,197.15	1,800.00
Agreement for Sale, at 6% - - - - -	4,802.33	600.00
Agreement for Sale, at 7% - - - - -	54,968.55	2,400.00
	<u>\$135,594.21</u>	<u>\$14,400.00</u>

All of the above loans can be paid off by the company at any time without bonus payments.

### 4. Capital:

Of the 751,407 shares outstanding at July 31st, 1965, 75,000 shares are being held in escrow in connection with shares issued for properties.

### 5. Options to Purchase:

The Company has secured options to purchase land on the Trans-Canada Highway west of Calgary at any time in the next 50 years at fair market value and an Edmonton service station within the next year at \$14,000.00. There is a further option to acquire for \$90,000.00, four lots, a 3 bay service station, 2 bay body shop, restaurant and second storey office premises situated in Edmonton.

## STATEMENT OF DEFICIT

for the year ended July 31st, 1965

Net losses from operations, write off of petroleum and natural gas interests, incorporation and re-organization expenses, incurred prior to July 31st, 1963. (THE DATE OF CHANGE OF MANAGEMENT) (\$124,727.13)

Net losses from operations, including re-organization expenses but not depreciation for the year ended July 31st, 1964. 5,527.87
